5. **Efficient Service Search and Application:** Users can swiftly locate available services within the OSS system. Click the plus (+) option to reveal the service list. Easily search for the desired application and proceed to apply directly from the portal.

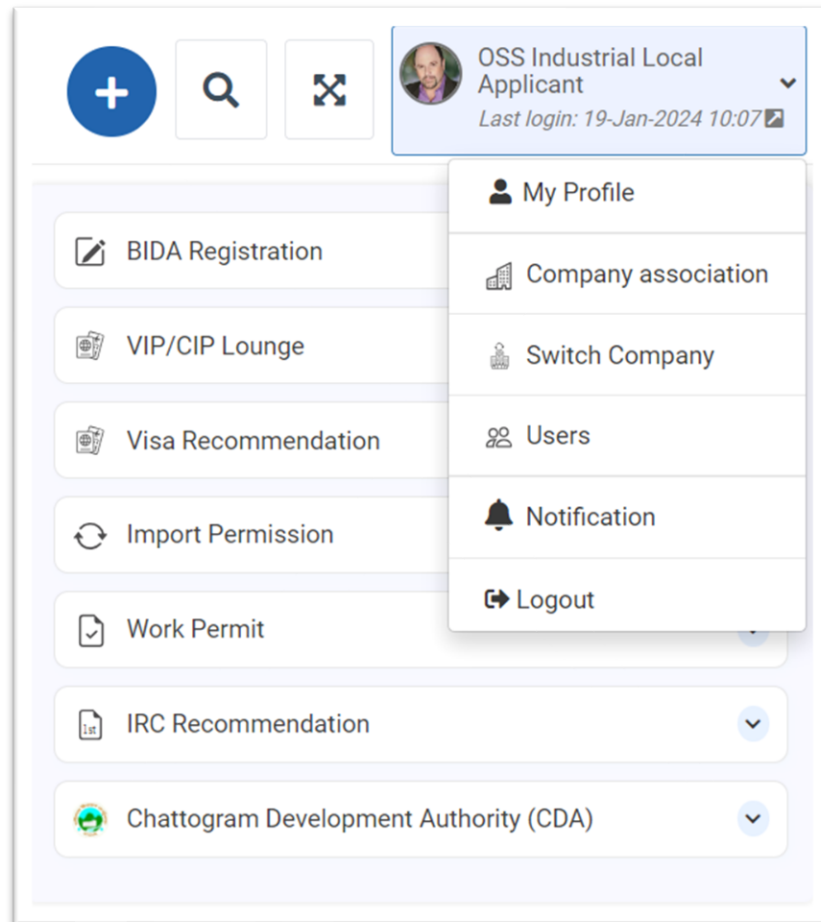

6. **Swift Application Search:** Managing numerous applications can be challenging. The search option simplifies the process, enabling quick retrieval of your desired application. Just enter the Tracking ID or Company name, and the application will be displayed instantly.

7. **Full Screen Mode Enhancement:** A new feature has been added for users' convenience. Enable full-screen mode on the OSS portal in your browser by clicking on the full-screen icon. The portal will seamlessly expand to fill your computer screen.

8. User Profile Information Update: Easily update personal information from the options. Consultants handling applications for multiple organizations can associate desired organizations with their profile by clicking on 'Company Association.' If you manage multiple organizations under your user account, switch between them seamlessly. Stay informed by checking related notifications under the 'Notifications' tab.
